

Prof. Dr. N. Hüser

Prof. Dr. W. Kauer

Praxis für Chirurgie · Endoskopie · Proktologie

## Specialist care for your digestive & coloproctological health

### Welcome to our Practice

Your well-being and satisfaction are our motivation.

At our practice, we combine medical expertise with a respectful, understanding approach. From your first contact through diagnostics, treatment and follow-up care, our goal is to ensure that you feel well informed, safe and taken seriously.

We believe that good medicine starts with dialogue.

You will receive clear explanations, honest recommendations and enough time to ask questions and participate in decisions about your care.

Sensitive medical topics remain sensitive.

We address them discreetly and professionally.

### Medical Services

We offer specialized diagnostics and treatment in the following areas:

- Digestive disorders and abdominal complaints
- Changes in bowel habits
- Swallowing disorders and esophageal symptoms
- Proctological conditions
- Preventive examinations and medical counselling

Diagnostic procedures include endoscopic examinations such as colonoscopy and gastroscopy, as well as further evaluations when medically indicated.

For examinations under sedation ("twilight sleep") or outpatient procedures, we cooperate closely with experienced anesthesiologists.

### Our Physicians

Our physicians have many years of experience in university hospitals and specialized centers and provide both conservative and surgical care.

Detailed physician profiles are available on our website.

### Our Team

Behind our practice is a closely coordinated and experienced team.

From reception to medical care, we work together to ensure a calm, structured and supportive environment. Discretion, attentiveness and respectful interaction are essential parts of our daily work.

### Before Your Appointment

Please bring:

Identification and health insurance card (if applicable)

Referral letter (if required)

Relevant medical reports or imaging

A list of current medications

**Important:** If your examination is planned with sedation, you must be accompanied by an adult person and are not allowed to drive on the same day.
